Amendments to the Claims

This listing of claims replaces all prior versions and listings of claims in the application.

Listing of Claims:

1.   (Cancelled)

2.   (Previously presented) The method of claim 8, wherein said at least on prearranged web document comprises a prearranged set of web documents.

3-4.   (Cancelled)

5.   (Previously presented) The method of claim 8, wherein said user web document and said prearranged web document both relate to the funeral industry.

6-7.   (Cancelled)

8.   (Currently amended) A method for automatically generating a web document in real time comprising:
        providing at least one prearranged web document wherein said at least one prearranged web document is capable of being displayed on a computer using a web browser;
        providing a database with preprogrammed information;
        providing a form document;

selecting user variables wherein said user variables are selected from said preprogrammed information using said form document; and

automatically <u>and dynamically</u> generating a user web document in real time configured for display on said computer, wherein said user web document is generated based on said desired user variables and said form document, said user web document being electronically linked to said prearranged web document,

wherein said user variables are in a first language and said user web document is generated in a second language, wherein said first and second languages are spoken languages.

9.   (Cancelled)

10.   (Original) The method of claim 8, further comprising automatically determining said second language from said computer or said web browser.

11-23. (Cancelled)

24.   (Previously presented) The method of claim 8, wherein said step of automatically generating a user web document comprises automatically generating a user web document using computer software programmed in PHP.

25.   (Currently amended) The method of claim 8, wherein said second language is automatically determined based <u>on</u> a web browser used by said user.

26-29. (Cancelled)

30.   (Currently amended) A system that automatically generates a web document in real time comprising:

a database with preprogrammed information;

a form document;

user variables wherein said user variables are selected from said preprogrammed information using said form document; and

a user web document that is capable of being displayed on a computer using a we browser, wherein said user web document is automatically generated based on said desired user variables and said form document,

a desired spoken language that is selected from a choice of spoken languages for said form document, and said user web document is ~~automatically~~ dynamically generated in real time in said desired spoken language, wherein said user web document relates to the funeral industry.

31-32.   (Cancelled)

33.   (Previously presented) The system of claim 30, wherein said user variables are in a first language and said user web document is generated in a second language.

34.   (Original) The system of claim 33, wherein said first and second languages are spoken language.

35.   (Cancelled)

36.   (Previously presented) A computer program product, tangibly stored on a computer-readable medium, for dynamically creating a web-based document in a spoken language from a web-based form document in a different spoken language, comprising instructions operable to cause a programmable processor to:

receive the web-based form document in a default spoken language, wherein the web-based form document comprises prearranged document template information;

automatically detecting a default spoken language for the web-based form document;

detecting one or more user variables that indicate a desired spoken language that is different from the default spoken language; and

dynamically creating the web-based document in the desired spoken language using the one or more user variables, wherein the web-based document is generated from the web-based form document according to the prearranged document template information.

37.   (Previously presented) The product of claim 36, wherein the prearranged document template information comprises information associated with a funeral industry.

38.   (Previously presented) The product of claim 37, wherein the product is configured to allow a user to create a web-based document comprising information for a deceased person in the desired spoken language.

39.   (Previously presented) The product of claim 38, wherein when the web-based form document is changed, automatically updating the created web-based documentation.

40.   (New) The method of claim 8, wherein at least one of said user variables is assigned to a graphic display, and wherein the graphic display presented when the web page is generated in said first language differs from the audio file presented when the web page is generated in said second language.

41.   (New) The method of claim 8, wherein at least one of said user variables is assigned to an audio file, and wherein the audio file presented when the web page is generated in said first language differs from the audio file presented when the web page is generated in said second language.
